Mr. Leaf Hua Li, Futu’s Chairman and Chief Executive Officer, said, “In the second quarter, we added 252 thousand net new funded accounts, bringing total funded accounts to 3.8 million, up 33.6% year-over-year. Growth in funded accounts this quarter was supported by continued momentum across our international markets, reinforcing the diversification of our client base. Malaysia led new funded account additions for the third consecutive quarter. Hong Kong and Singapore followed as key contributors, with new client cohorts in both markets demonstrating stronger initial monetization compared with prior periods, a signal of ongoing quality improvement in our more established markets.”

“Total client assets were HK\$1.40 trillion as of quarter end, up 43.6% year-over-year and 14.5% quarter-over-quarter. The growth was mainly attributable to higher market valuation of clients’ stock holdings, and to a lesser extent, net asset inflow. Margin financing and securities lending balance rose 30.5% quarter-over-quarter to HK\$95.1 billion, driven by an active Hong Kong IPO market, alongside upbeat sentiment that fueled higher utilization of leverage.”

¹ The number of funded accounts refers to the number of brokerage accounts with Futu that have a positive account balance. Multiple funded accounts by one client are counted as one funded account.

² Multiple brokerage accounts by one client are counted as one brokerage account.

³ The number of users refers to the number of user accounts registered with Futu.

⁴ Non-GAAP adjusted net income is defined as net income excluding share-based compensation expenses.

“Total trading volume reached a record HK\$6.42 trillion, up 78.8% year-over-year and 54.6% quarter-over-quarter, supported by a meaningful acceleration in U.S. stock trading activity. U.S. stock trading volume rose 67.2% sequentially to HK\$5.02 trillion, driven by heightened client interest in semiconductor and other AI value chain names. Hong Kong stock trading volume grew 15.9% quarter-over-quarter to HK\$1.17 trillion, reflecting client engagement in semiconductor, China internet, and newly listed AI names.”

“Total client assets in wealth management increased 10.4% year-over-year and 1.0% quarter-over-quarter to HK\$180.2 billion, primarily supported by growth in equity fund holdings amid strong global equity market performance. In Hong Kong, we added new global equity mutual funds to our platform and expanded thematic investor engagement around frontier areas such as the space economy. In Singapore, we further broadened our fund shelf with new local equity strategies aligned with the country's capital markets development priorities.”

“As of quarter end, we cumulatively served 683 IPO distribution and IR clients, up 32.1% year-over-year. Against a robust Hong Kong IPO backdrop, we provided investment banking services to nearly 60% of new listings during the quarter, including those of Star Sports Medicine, Lightelligence, and Metis TechBio.”

“In recent months, we made meaningful progress across our global franchise. In June, Moomoo launched Prediction Markets in the U.S., broadening the ways our clients can engage with financial markets and real-world developments, driving active client participation. Futu Securities also received SFC approval to launch a virtual asset financing service through our proprietary trading platform PantherTrade, further expanding our product runway within Hong Kong's evolving virtual asset framework. In July, we obtained a Type A license from the Thailand Securities and Exchange Commission, positioning us to launch Moomoo Thailand and further extend our footprint across Southeast Asia. Together, these developments deepen the product breadth and expand the geographic reach of our platform for global investors.”

Mr. Arthur Yu Chen, Futu's Chief Financial Officer, added, “As of June 30, 2026, we have repurchased approximately 3.8 million ADSs for an aggregate consideration of approximately US\$418 million in open market transactions in accordance with the authorization under the current share repurchase program.”

Through its proprietary digital platforms, *Futubull* and *Moomoo*, the Company provides a full range of investment services, including trade execution and clearing, margin financing and securities lending, and wealth management. The Company also provides corporate services, including IPO distribution, investor relations and ESOP solution services.

Use of Non-GAAP Financial Measures

In evaluating the business, the Company considers and uses non-GAAP adjusted net income, a non-GAAP measure, as a supplemental measure to review and assess its operating performance. The presentation of the non-GAAP financial measure is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with U.S. GAAP. The Company defines non-GAAP adjusted net income as net income excluding share-based compensation expenses. The Company presents the non-GAAP financial measure because it is used by the management to evaluate the operating performance and formulate business plans. Non-GAAP adjusted net income enables the management to assess the Company's operating results without considering the impact of share-based compensation expenses, which are non-cash charges. The Company also believes that the use of the non-GAAP measure facilitates investors' assessment of its operating performance.

Non-GAAP adjusted net income is not defined under U.S. GAAP and is not presented in accordance with U.S. GAAP. This non-GAAP financial measure has limitations as analytical tools. One of the key limitations of using non-GAAP adjusted net income is that it does not reflect all items of expense that affect the Company's operations. Share-based compensation expenses have been and may continue to be incurred in the business and is not reflected in the presentation of non-GAAP adjusted net income. Further, the non-GAAP measure may differ from the non-GAAP information used by other companies, including peer companies, and therefore their comparability may be limited.

The Company compensates for these limitations by reconciling the non-GAAP financial measure to the nearest U.S. GAAP performance measure, all of which should be considered when evaluating the Company's performance.

For more information on this non-GAAP financial measure, please see the table captioned "Unaudited Reconciliations of Non-GAAP and GAAP Results" set forth at the end of this press release.
